

Title sheet for synopsis evaluation of Major Project (Civil Engineering)

Session _____

Name of Students	
Class roll number of Students	
Name of the guide	
Title of the problem	Identify an appropriate title which reflects the content/objectives of the study.
Introduction	Introduce the problem in about 250 words, its significance to the civil engineering community and society at large and purpose of the study. Try to provide an adequate background and potential impact of the reported work on the state of the art or state of practice, avoiding a detailed literature survey or a summary of the results in the introduction.
Literature review	Give a brief account of the earlier research findings in the last 5 years relevant to the topic. Try to highlight the shortcomings in these studies.
Objectives	Identify and state the objectives of the project (based upon the literature review) that summarize what is to be achieved at the end of the study/project. Try to closely relate these to the research problem. It is possible (and advisable) to break down a general objective into smaller, logically connected parts in the form of bullet
Methodology	Give a detailed description of methods and approaches that you are going to plan/use to achieve the identified objectives.
References	Give a list of earlier research papers, books, and manuals etc., that are referred to formulate the problem.

Signature of the student

I have gone through the content of the synopsis submitted by _____
and found it in order and fit to carry on the proposed studies.
